

New Product Bulletin

Premium Workshop Radiator Coolant and Workshop Consumables

- ✓ Economic 20L Drums
- ✓ Premium Quality
- ✓ 100% Australian Made
- ✓ Affordable Pricing

CSF20 Jayrad Premium Cooling System Flush

CSF20

- Premium cooling system flush specially formulated to remove sludge, grease and scale from radiators and cooling system water jackets
- Non-acidic, non-solvent and biodegradable for safe use on cast iron and alloy engines
- Will not affect or degrade water pump, seals, radiator hoses or internal components
- Standard dose rate of 500ml per cooling system up to 10 litres can be overdosed up to 1L per 10 litres for extremely dirty systems.
- Can be added to existing coolant but best results achieved when applied with clean water after old coolant has been removed
- Safe and will not damage or stain external surfaces
- 20L Drum with tap provision
- MSDS including safety information available for download at ishop@cooldrive.com.au

JAYRAD PREMIUM COOLTECH COOLANTS

CTECH20 Jayrad Premium Cooltech Anti-Freeze / Anti-Boil Coolant

CTECH20P

CTECH20G

CTECH20R

CTECH20B

- Premium Type A Long life Anti-Freeze Anti-Boil concentrate
- 4 years or 1 million kilometre protection when mixed at a rate of 50% with clean water. Refer OEM specifications for mix rates
- Maximum engine protection and silicate Free
- Provides premium cavitation and liner pitting protection as contains high rate of 1010 g/L of Mono Ethylene Glycol
- OAT (organic additive technology based)
- Suitable for ferrous and aluminium alloy engine constructions
- Recommended for all general aftermarket servicing of passenger vehicles, heavy duty trucks and stationary engines including mining equipment
- Exceeds a wide range of National, International and OEM standards
- Available in Green, Red, Blue & Pink to match original OEM dyes
- Interchanges with Tectaloy Long Life AF/AB
- 20L drum with tap provision
- MSDS including safety information available for download at ishop@cooldrive.com.au

CPM20 Jayrad Premium Cool Plus Max Type B Corrosion Inhibitor

CPM20R

CPM20G

- Premium water based corrosion inhibitor concentrate
- 3 years or 100,000 kilometre protection. 1 Litre of Cool Plus Max treats 20 Litres of demineralised water
- Maximum corrosion protection & is phosphate, amine, nitrate & silicate free. Contains a pH buffered blend of additives to guard against corrosion of steel, aluminium, brass copper and solder
- OAT (organic additive technology based)
- Suitable for ferrous and aluminium alloy engine constructions
- Recommended for all general aftermarket servicing of passenger vehicles, heavy duty trucks and stationary engines including mining equipment where a corrosion inhibitor is specified by the OEM manufacturer
- Exceeds a wide range of National, International and OEM standards
- Available in Green & Red
- 20L Drum with Tap provision
- Interchanges with Tectaloy Xtra Cool Gold
- MSDS including safety information available for download at ishop@cooldrive.com.au

JAYRAD PREMIUM WORKSHOP CONCENTRATED CLEANERS & DEGREASERS

WWA20 Jayrad Premium Windscreen Cleaner Additive

WWA20

- Premium blend of surface active agents to give rapid effective cleaning for a clear view when driving
- Water based bio degradable free from harmful phosphates, ammonia, petroleum hydrocarbons & chlorinated solvents
- Removes bugs, tar, sap, bird droppings and general grime from windscreens
- Very economical 20 Litres will treat 800 vehicles at a ratio of 25ml per 2 litre reservoir
- For best results used demineralized water
- Does not affect external surfaces or any leave residue on external trim
- Classified non-toxic

BM20 Jayrad Biomax Non-Solvent Water Based Premium Degreaser

BM20

- Biodegradable non-solvent based super strength water based degreaser, rapidly removes oil, grease and grime from engines, floors and perfect for most workshop degreasing applications
- Can be diluted and be used as a general spray and wipe for lighter soiling in workshop applications at a rate of 1:100
- Use undiluted for heavy soiling and apply with a brush and rinse off with strong jet of water
- Biomax is non-toxic, non-caustic, non-flammable & solvent free
- Can be used diluted through pressure washers, steam cleaners and automatic scrubbers
- 20L Drum with tap provision
- Classified non-toxic

JBC20 Jayrad Premium Brake and Parts Cleaner

JBC20

- Premium grade unique formulation of highly evaporative solvents to remove brake fluid, oil and dust from brake components and engine parts
- Will help reduce brake squeal and can be applied without the need to disassemble components
- Can be used to clean chains and slides
- Will not leave any chemical residue
- Solvent based, protective gloves and eyewear should always be worn when in use
- 20L Drum with tap provision
- Classified flammable liquid Class 3
- MSDS including safety information available for download at ishop@cooldrive.com.au

New Product Bulletin

SDP20 Jayrad Solvent Based Premium Degreaser

SDP20

- Solvent based degreaser, powerful blend of solvents and emulsifying agents for cleaning, dispersing and degreasing operations by soak, spray or brush application
- Safe on all metals, will not damage paintwork if used as directed. Rinses off easily in cold water
- Low electrical conductivity so can be used in and around battery terminals
- Rapidly removes most oils, greases and lubricants
- Ideal for general clean-ups operations on engines, heavy machinery, and workshop equipment including floors and driveways
- Suitable for use in Workshop Parts Cleaners excluding Bio remedial parts washers
- Suitable for cleaning bilges and tanks in marine applications
- For heavy soiling apply by brush and allow to penetrate for 2 minutes and hose off with a strong jet of water
- Solvent based, protective gloves and eyewear should always be worn when in use
- Use undiluted as is NOT miscible with water
- 20L Drum with tap provision
- Classified flammable liquid Class 3
- MSDS including safety information available for download at ishop@cooldrive.com.au

TC20 Jayrad Triple Clean Industrial Cleaner, Degreaser & Sanitiser

TC20

- Premium grade quality industrial cleaner that emulsifies grease, oils and disinfects instantly. Will kill germs and algae. Ideal for cleaning mould in carpets and spot cleaning of upholstery, trim including dashboards and instrument clusters
- Can be diluted and be used as a general cleaning spray and wipe plus disinfectant for lighter soiling in workshop applications and as a vehicle detailer at a rate of 1:20
- Generally used for cleaning manually or with all types of mechanical cleaning equipment via pressure washers, steam cleaners, soak tank ultrasonics or automatic scrubbers at a ratio of 1:10 to 1:40 mixed with water
- Do not leave on painted surfaces for long periods of time or in direct sunlight, paint fading may occur
- 20L Drum with tap provision
- Test in an inconspicuous spot before application to test for colour fastness
- Solvent based, protective gloves and eyewear should always be worn when in use
- Classified corrosive substance class 8
- MSDS including safety information available for download at ishop@cooldrive.com.au
