

A2L Vacuum Pump

Introducing the New Jayair A2L Vacuum Pump, a powerful and reliable tool designed specifically for automotive A/C technicians. This vacuum pump is packed with features to enhance your automotive A/C system servicing.

Part No: TO9150

Key Features

Sparkproof Design

Ensures safety when working with A2L refrigerants commonly used in automotive A/C systems (R1234yf, R134a, R32 and R404a)

2 Stage Direct Drive

Achieves 150L/min and a deep 25-micron vacuum, effectively removing air and moisture for improved system performance and longevity.

Low RPM Motor

Specifically engineered for longer life and reliable operation in demanding automotive A/C service environments.

High Starting Torque

Pump Motor is specially designed for low-temperature or low-voltage conditions, ensuring normal starting performance even in winter (>5°C temperature).

Aluminium Alloy Casing on Pump Motor

Provides excellent heat dissipation for enhanced continuous duty without overheating.

Solenoid Valve

Protects your system from oil contamination during power failures, ensuring the integrity of your A/C system.

Flexible Connections

Comes with 1/4", 3/8", and R134a 1/2" ACME tee connectors for secure sealing. (Adaptor TO1533 may be required for R1234yf L/H Acme connections).

Ergonomic Design

Features an ergonomic handle and shock-proof base for comfortable and stable operation during servicing.

Features:

- 5-meter 240V power lead
- 1 Year warranty
- Sparkproof design
- 2 stage direct drive system
- Low RPM motor
- Solenoid valve
- Flexible connections
